▾ Lab#1, NLP Spring 2023

This is due on 2023/03/06 15:30, commit to your github as a PDF (lab1.pdf) (File>Print>Save as PDF).

IMPORTANT: After copying this notebook to your Google Drive, please paste a link to it below. To get a publicly-accessible link, hit the *Share* button at the top right, then click "Get shareable link" and copy over the result. If you fail to do this, you will receive no credit for this lab!

▾ Question 1 (100 points)

Let's switch over to coding! Write some code in this cell to compute the number of unique word **tokens** in this paragraph (5 steps of Text Normalisation: 1. Lowercase Conversion, 2. Remove punctuations, 3. Stemming, 4. Lemmatisation, 5. Stopword Removal). Use a whitespace tokenizer to separate words (i.e., split the string by white space). Be sure that the cell's output is visible in the PDF file you turn in on Github.

按兩下 (或按 Enter 鍵) 即可編輯

```python
import nltk
from nltk import word_tokenize
from nltk.stem import PorterStemmer, LancasterStemmer, SnowballStemmer
from nltk.stem import WordNetLemmatizer
from nltk.corpus import stopwords
nltk.download('punkt')
nltk.download('wordnet')
nltk.download('omw-1.4')
nltk.download('stopwords')
```

```
[nltk_data] Downloading package punkt to /root/nltk_data...
[nltk_data]   Package punkt is already up-to-date!
[nltk_data] Downloading package wordnet to /root/nltk_data...
[nltk_data]   Package wordnet is already up-to-date!
[nltk_data] Downloading package omw-1.4 to /root/nltk_data...
[nltk_data]   Package omw-1.4 is already up-to-date!
[nltk_data] Downloading package stopwords to /root/nltk_data...
```

```
[nltk_data]   Package stopwords is already up-to-date!
True
```

```python
def remove_punct(token):
    return [word for word in token if word.isalpha()]

paragraph = '''Last night I dreamed I went to Manderley again. It seemed to me
that I was passing through the iron gates that led to the driveway.
The drive was just a narrow track now, its stony surface covered
with grass and weeds. Sometimes, when I thought I had lost it, it
would appear again, beneath a fallen tree or beyond a muddy pool
formed by the winter rains. The trees had thrown out new
low branches which stretched across my way. I came to the house
suddenly, and stood there with my heart beating fast and tears
filling my eyes.'''

# DO NOT MODIFY THE VARIABLES
tokens = 0
word_tokens = []

# YOUR CODE HERE! POPULATE THE tokens and word_tokens VARIABLES WITH THE CORRECT VALUES!

#Lowercase Coversion
Lower_paragraph = paragraph.lower()

#Tokenization
word_tokens = word_tokenize(Lower_paragraph)

#Remove_punctuations
word_tokens = remove_punct(word_tokens)

#Stemming
port = PorterStemmer()
stemmed_port = [port.stem(token) for token in word_tokens]

#Lemmatisation
lemmatiser = WordNetLemmatizer()
lemmatised = [lemmatiser.lemmatize(token) for token in stemmed_port]

#Stopword Removal
stop_words = set(stopwords.words("english"))

words_no_stop = [word for word in lemmatised if word not in stop_words]
word_tokens = words_no_stop
tokens = len(word_tokens)
# DO NOT MODIFY THE BELOW LINE!
print('Number of word tokens: %d' % (tokens))
print("printing lists separated by commas")
print(*word_tokens, sep = ", ")
```

```
Number of word tokens: 53
printing lists separated by commas
last, night, dream, went, manderley, seem, wa, pas, iron, gate, led, driveway, drive, wa, narrow, track,
```
